STUDENT   2022
Zuitt Coding Bootcamp

- Write modern and reusable code for a simple but well-planned web page

- Built and tested web pages to work in different browsers and devices to ensure browser compatibility and mobile responsiveness

- Designed and implemented user-facing interface that validates and accepts data input

- Structured, tested and deployed a database for a sample course booking and online shop app

- Built and deployed a standard e-commerce app that has working functionalities from register to checkout and with a separate access level for admin and user

- Presented work and shared ideas within our group of students on how to implement functionalities in a web design
