  - https://gpushopsantos.vercel.app/

ZUITT CODING BOOTCAMP   2022

- Write modern and reusable code for simple but well-planned web pages
- Built and tested web pages to work in different browsers and devices to ensure browser compatibility and mobile responsiveness
- Designed and implemented user-facing interface that validates input
- Structured, tested and deployed a MongoDB database for a sample course booking and online shop app
- Built and deployed an e-commerce (MERN) app that has working functionalities from register to checkout and with separate access levels for admin and user.
- Presented work and shared ideas within our group on how to implement functionalities in a web design.
